Objective

As a BSCS student at NUML University Islamabad, I am eager to gain practical exposure and hands-on experience in the field of computer science. I aim to apply my knowledge in full stack web development, problem-solving, and modern computing concepts in a real-world environment. I am looking for an opportunity that will help me learn from industry professionals, understand software development workflows, and enhance my technical and soft skills to prepare for future career growth.

Qualifications

BS Computer Science (2022 – Present)

NUML University Islamabad

Intermediate — ICS (Computer Science) (Completed)

IMCB F-11/1 Boys College Islamabad

Matriculation — Computer Science (Completed)

IMCB F-11/1 Boys College Islamabad

Key Subjects Completed and Academic Involvement

Core Subjects Completed:

Introduction to Programming, Object Oriented Programming (OOP), Data Structures & Algorithms (DSA), Database Management System (DBMS), Mobile App Development (Flutter/Dart), Computer Networks, Analysis of Algorithms, Machine Learning, Advanced DBMS, Technical & Business Writing.

Projects:

1. MyClinic — Clinic Management System (PHP, MySQL, Bootstrap)

Built a full-featured clinic management system with modules for patient records, appointments, and billing. Includes an admin dashboard and is deployed live as a flagship portfolio project.

2. RealState — Property Listing Platform (PHP, MySQL, Bootstrap)

Developed a property listing platform with advanced search filters and role-based access control for agents and users. Deployed live on InfinityFree.

3. Zafran_Restaurant — Restaurant Web Application (PHP, MySQL, JavaScript)

Delivered a complete restaurant web app with menu management, item categorization, and ordering flow. Used as a live demo for targeting local Pakistani restaurant businesses.

4. 3D Portfolio — Solar System Based Portfolio (HTML, CSS, JavaScript, Three.js)

Designed and developed a creative 3D portfolio website featuring a solar system animation built with Three.js. Showcases projects and skills in an interactive and visually engaging environment.

Skills

Technical Skills:

- Programming: PHP, JavaScript (ES6+), HTML5, CSS3, SQL, Dart, Python, C#
- Frameworks & Libraries: React.js, Bootstrap 5, Flutter, Three.js
- Databases: MySQL, MongoDB — CRUD operations, schema design, query optimization
- Tools: Git, GitHub, VS Code, REST APIs, Postman, Vercel
- Other: Graphic Designing (Adobe Illustrator, Canva), Video Editing

Computer Science Concepts:

- Understanding of Algorithms, Data Structures, and OOP principles

- Knowledge of Machine Learning concepts: KNN, Naive Bayes, Data Preprocessing
- Hands-on with Database normalization, ACID transactions, and indexing
- Familiar with Computer Networks: OSI/TCP-IP models, IP addressing, subnetting

Soft Skills:

- Problem-solving and logical thinking
- Strong communication and client management skills
- Team collaboration in group and freelance projects
- Quick learner and adaptive to new technologies

Interests

- Building full-stack web applications using modern frameworks and technologies
- Exploring and experimenting with 3D web development using Three.js
- Freelancing and delivering real-world solutions to clients on Fiverr
- Learning and applying Machine Learning and Artificial Intelligence concepts
- Graphic Designing using Adobe Photoshop, Illustrator, and Canva
- Video editing and creating digital content
- Participating in coding challenges and tech events
- Staying updated with latest trends in web development and software engineering
- Exploring emerging technologies like AI, Data Science, and Cloud Computing
- Playing Football as an Outdoor Sport and Video games as Indoor.
